Dear Parents,

I am Ms. Lin, your child's teacher. This note is about our students' free time. This is our class survey. There are 30 students in Class 710.

Here are the results. Three students read books in their free time. Reading is great! Also, three students listen to music. Music is fun. 24. Sports are good for students' bodies, and they are fun, too.

However, one number is very big. Twenty students 25. This is more than half of the class. Our children are smart, and they can do many other things. There are many fun things to do outside. They can play sports. They can read books. But phone games are not good for their eyes or their health.

I am not angry, but I am worried. I hope our children can have a good life 26. Thank you for reading this note.

Best wishes,

Ms. Lin

Bruce is my good classmate in Class 710. He is a happy and smart student. Bruce's legs are not strong. And he can't run or join our sports team. He moves around with a wheelchair.

Our school is very helpful and friendly. There are ramps near the stairs, so Bruce can go from floor to floor. The doors to our classrooms are also wide. Bruce can go to the library, the office, and the music room in school. There is always a space next to his desk. This space is big enough for his wheelchair. Everyone is important!

Bruce can do many great things! He can solve difficult Math problems. Bruce is always the leader in our group work. He is good at making a plan for the group. Sometimes, my classmates and I help Bruce. We carry his books. And he can help us with our homework. We are a team!

Bruce is not different from us. He is just a great friend. Our friendly school is a great place for everyone!
